Smith & Wesson combined a Scandium alloy frame with a Titanium cylinder to build the strongest and lightest weight 7-shot .357 Magnum revolver made. The result...maximum power in a small, lightweight, easy-to-carry package. Scandium alloy is used for small, medium and large frame revolvers. Smith & Wesson's lightest and strongest revolvers deliver dependable power every time.

S&W 386PD Mountain Lite, .357M

Revolver Action: Single / Double Caliber: 357 Remington Mag Barrel Length: 3 1/8" Capacity: 7 rd Grips: Hogue Bantam; Sights: Hi-Viz Orange Dot (Front); Adj V-Notch (Rear) Weight: 18.5 oz Finish: Scandium/Titanium/Stainless Steel

Smith & Wesson's new Model 386 PD "AirLite" Se™, a lightweight seven-shot .357 Magnum DA revolver. After seeing its sales base erode exponentially as a result of its capitulation to the wishes of anti-gunners, Smith & Wesson has recently been bought out by **Saf-T-Hammer**, a U.S. manufacturer of gun locks owned by a former long-time S&W employee, and the **Tomkins** reign of terror is at an end. We wish the new owners of Smith & Wesson
